ปฏิบัติราชการแทน อธิการบดีมหาวิทยาลัยนครสวรรค์

วันที่ 11/8/67

population of 633,158 (2023) has ambitious goals to foster a robust science, technology, and innovation (ST&I) environment, vital for its economic transformation and integration into the European Research Area (ERA).

In this 2nd EURAXESS ASEAN Quarterly Newsletter (July 2024), we focus on the EURAXESS Country Montenegro and provide key information about its higher education landscape, research environment, research priorities and innovation strategies, legislative and policy frameworks, as well as initiatives in international cooperation.

Hot Topic

When the European Commission launched its current research and innovation (R&I) framework programme – Horizon Europe (2021-2027) – much was made of a novel feature, called “missions”, aimed at tackling some of society’s greatest challenges. The Horizon Missions were inspired by the United States’ now famous 1960s ‘moonshot’ Apollo space programme which [NASA](#) today calls a “dramatic and ambitious goal [involving] enormous human efforts and expenditures to make [it] a reality by 1969”.

Combining R&I with new forms of governance, citizen engagement and collaboration, the European Commission named five societal challenges to be tackled through its own series of moonshot missions:

Mission CLIMATE: prepare Europe for adapting to climate change; create 150 climate-resilient regions and communities; read [more...](#)

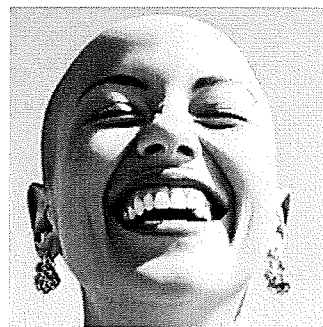

Mission CITIES: 100+ model cities (living labs); turn all cities in Europe climate-neutral by 2050; read [more...](#)

Mission SOIL: contribute to the objective of 75% healthy soils in Europe; support 100 demonstration cases; read [more...](#)

Mission WATERS: clean oceans, seas and waters from pollution; restore eco-systems; foster a CO2 neutral blue economy; read [more...](#)

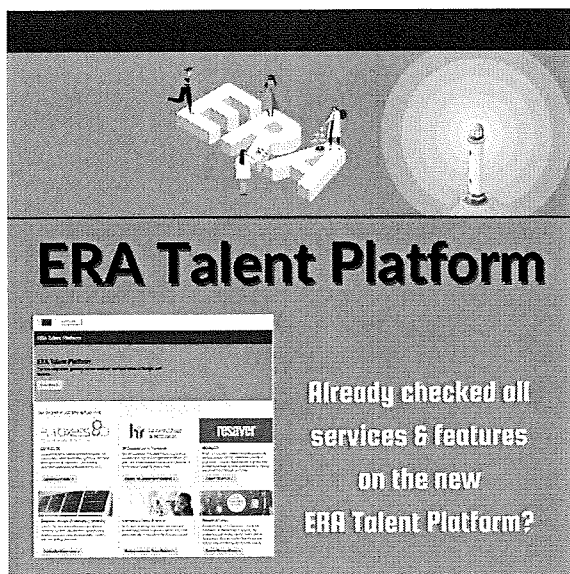

Mission CANCER: save the lives of more than three million people, improve expectancy and quality of life; read [more...](#)

The missions aimed to deliver concrete results using innovative, representative, sustainable and people-centred approaches guided by appointed experts assembled into dedicated Mission Boards. Anyone with an interest in a brighter future is was encouraged to get involved, including scientists, entrepreneurs, citizen groups, schools, etc. And each Mission was given a specific timeframe and budget – depending on the complexity and size of the challenge.

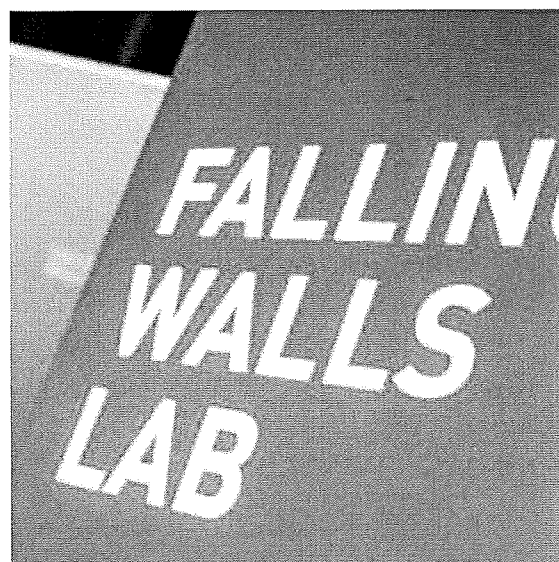

This article gives an overview of the Missions' overall progress at what is just past the midway point of the seven-year Horizon Europe programme. As a start, let's delve into the main (direct) health-related challenge, Mission CANCER [here](#).

Falling Walls Lab is coming to Southeast Asia. Falling Walls Lab is a global interdisciplinary pitch competition for students, early-career professionals and young researchers. It is organised by the Falling Walls Foundation in collaboration with a network of international partners. EURAXESS ASEAN is happy to promote and support the events among its young researcher community.
All it takes is 3 minutes...

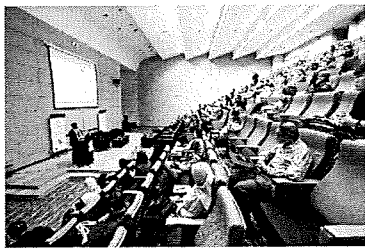

EURAXESS ASEAN: Recent Activities

In partnership with the EU Delegation to Vietnam and the Ministry of Science and Technology (MOST) Vietnam, EURAXESS ASEAN organised the EU-Vietnam Research & Innovation Community Meeting on 21 May 2024. Over 200 policy makers, business representatives, researchers, academics, and scientists from various disciplines joined the event, which coincided with the Vietnam National Day for Science and Technology. Read more about the programme and outcomes of the event [here](#).

In May 2024, Indonesia and Australia co-hosted the Clean Energy Ministerial (CEM) Senior Officials' Meeting and the Mission Innovation (MI) Annual Gathering in Bali, Indonesia. On this occasion, EURAXESS ASEAN organised the “EU-Indonesia Synergy Meetup on Clean Hydrogen and Sustainable Cities” on 14 May 2024 in collaboration with Udayana University, Denpasar Campus, Bali. Ms Rosalinde van der Vlies, Director, Clean Planet Directorate, Directorate-General for Research and Innovation, European Commission, delivered the Opening Remarks. Read [more...](#)

In collaboration with Universiti Putra Malaysia (UPM) in Kuala Lumpur, EURAXESS ASEAN organised the “EU-Malaysia Research and Innovation Meeting” on 25 June 2024. Close to 150 researchers - mostly Faculty Members holding a Doctoral Degree - attended the information and networking event, which also included a panel discussion with Horizon Europe beneficiaries from UPM. Read [more...](#)

As part of our mission to Malaysia, the EURAXESS ASEAN team also visited Universiti Malaya (UM) and representatives of the leadership team from the Research Centre, Faculty of Medicine, as well as organised a EURAXESS ASEAN Roadshow briefing in collaboration with Universiti Teknologi Malaysia (UTM). Read more about Malaysia’s participation in Horizon Europe in our ASEAN Country Profiles [here](#).

Following the 2024 Open Call for MSCA-PF, EURAXESS ASEAN organised an information webinar on the MSCA Postdoctoral Fellowship programme on 30 May 2024. Expert speaker was Ms Eugenia Shadlova, French National Contact Point for Marie Skłodowska-Curie Actions.

We also invited interested researchers for a targeted MSCA PF Matchmaking session and webinar on 19 June 2024, in collaboration with the South East Technological University (SETU) in Ireland. Expert speaker was Dr Geraldine Canny, Head of Research at SETU and former MSCA NCP for Ireland. Watch the webinar recordings here:
